Appl. No. 10/576,871

**RECEIVED
CENTRAL FAX CENTER**

AUG 06 2008

(B2) a symbol image data transmission request information receiving means that receives the symbol image data transmission requests and the resolution related information which are transmitted from the mobile phone terminal,

(B3) a terminal resolution discrimination means that discriminates the symbol image data transmitted to the mobile phone terminal on the basis of the resolution related information received, and

(B4) a symbol image data transmitting means that transmits the symbol image data which is discriminated by the terminal resolution discrimination means in correspondence with the resolution of the information display screen of the mobile phone terminal.

Claim 7 (Original): A server according to Claim 6, capable of transmitting to and receiving image data from a mobile phone terminal comprising:

a terminal-side image data identification information storage means that stores terminal-side image data identification information constituting identification information of the symbol image data stored in the terminal-side symbol image data storage means,

an identification information transmission request information transmitting means that transmits server-side image data identification information transmission requests for the server to transmit server-side image data identification information constituting identification information of the symbol image data stored in the server, before creating images displayed on the information display screen,

a server-side image data identification information receiving means that receives the server-side image data identification information transmitted from the server,

KIKUCHI ET AL.
Appl. No. 10/576,871

a latest symbol image data discrimination means that discriminates whether the symbol image data stored in the mobile phone terminal are the latest data, on the basis of the server-side image data identification information and the terminal-side image data identification information received, and

the symbol image data transmission request information transmitting means that transmits the symbol image data transmission request information and the resolution related information to the server when the symbol image data stored in the mobile phone terminal are determined as not being the latest data,

wherein the server comprises the following components (B5) through (B7):

(B5) a server-side image data identification information storage means that stores the server-side image data identification information constituting identification information of the symbol image data stored in the server-side symbol image data storage means,

(B6) a server-side image data identification information transmission request information receiving means that receives the server-side image data identification information transmission requests transmitted from the mobile phone terminal, and

(B7) a server-side image data identification information transmitting means that transmits the server-side image data identification information, upon receiving the server-side image data identification information transmission requests.

Claim 8 (Original): A server according to Claim 6, capable of transmitting to and receiving image data from a mobile phone terminal comprising:

KIKUCHI ET AL.
Appl. No. 10/576,871

a terminal-side image data identification information storage means that stores terminal-side image data identification information constituting identification information of the symbol image data stored in the terminal-side symbol image data storage means,

the symbol image data transmission request information transmitting means that transmits the symbol image data transmission requests, the resolution related information, and the terminal-side image data identification information to the server, before creating images displayed on the information display screen, and

a latest data notice information receiving means that receives notice of information on the latest data indicating that the symbol image data stored in the terminal-side symbol image data storage means are the latest data,

wherein the server comprises the following components (B5), and (B8) through (B11):

(B5) a server-side image data identification information storage means that stores server-side image data identification information constituting identification information of the symbol image data stored in the server-side symbol image data storage means,

(B8) the symbol image data transmission request information receiving means that receives the symbol image data transmission requests, the resolution related information, and the terminal-side image data identification information which are transmitted from a mobile phone terminal,

(B9) a latest symbol image data discrimination means that discriminates whether the symbol image data stored in the mobile phone terminal are the latest data, on the basis of the terminal-side image data identification information and the server-side image data identification information received,

KIKUCHI ET AL.
Appl. No. 10/576,871

(B10) a latest data notice information transmitting means that transmits the notice of information on the latest data and does not transmit the symbol image data stored in the server to the mobile phone terminal, when it is determined that the symbol image data stored in the mobile phone terminal are the latest data, and

(B11) the terminal resolution discrimination means that discriminates the transmitted symbol image data on the basis of the resolution related information received, when it is determined that the symbol image data stored in the mobile phone terminal are not the latest data.

Claim 9 (Original): A mobile phone terminal capable of transmitting to and receiving image data from a server comprising:

a server-side symbol image data storage means that stores symbol image data which are used in creating display images partly constituting specific graphic symbols arranged on the information display screen of the mobile phone terminal in correspondence with the resolution of the information display screen,

a symbol image data transmission request information receiving means that receives symbol image data transmission requests to transmit the symbol image data stored in the server and resolution related information pertinent to the resolution of the information display screen,

a terminal resolution discrimination means that discriminates the symbol image data transmitted to the mobile phone terminal on the basis of the resolution related information received, and

KIKUCHI ET AL.
Appl. No. 10/576,871

a symbol image data transmitting means that transmits the symbol image data which is discriminated by the terminal resolution discrimination means, in correspondence with the resolution of the information display screen of the mobile phone terminal,

wherein the mobile phone terminal comprises the following components (A1) through (A5):

(A1) the information display screen,

(A2) a resolution related information storage means that stores the resolution related information,

(A3) a terminal-side symbol image data storage means that stores the symbol image data,

(A4) a symbol image data transmission request information transmitting means that transmits the symbol image data transmission requests and the resolution related information, and

(A5) a symbol image data receiving means that receives the symbol image data transmitted from the server.

Claim 10 (Original): A mobile phone terminal according to Claim 9, capable of transmitting to and receiving image data from a server comprising:

a server-side image data identification information storage means that stores server-side image data identification information constituting identification information of the symbol image data stored in the server-side symbol image data storage means,

a server-side image data identification information transmission request information receiving means that receives server-side image data identification information transmission

KIKUCHI ET AL.
Appl. No. 10/576,871

requests transmitted from the mobile phone terminal for transmission of the server-side image data identification information, and

a server-side image data identification information transmitting means that transmits the server-side image data identification information upon receiving the server-side image data identification information transmission request,

wherein the mobile phone terminal comprises the following components (A6) through (A10):

(A6) a terminal-side image data identification information storage means that stores terminal-side image data identification information constituting identification information of the symbol image data stored in the terminal-side symbol image data storage means,

(A7) an identification information transmission request information transmitting means that transmits the server-side image data identification information transmission requests to the server, before creating images displayed on the information display screen,

(A8) a server-side image data identification information receiving means that receives the server-side image data identification information transmitted from the server,

(A9) a latest symbol image data discrimination means that discriminates whether the symbol image data stored in the mobile phone terminal are the latest data, on the basis of the server-side image data identification information and the terminal-side image data identification information received, and

(A10) the symbol image data transmission request information transmitting means that transmits the symbol image data transmission request information and the resolution related information to the server, when the symbol image data stored in the mobile phone terminal are determined as not being the latest data.

KIKUCHI ET AL.
Appl. No. 10/576,871

Claim 11 (Original): A mobile phone terminal according to Claim 9, capable of transmitting to and receiving image data from a server comprising:

a server-side image data identification information storage means that stores server-side image data identification information constituting identification information of the symbol image data stored in the server-side symbol image data storage means,

the symbol image data transmission request information receiving means that receives the symbol image data transmission requests, the resolution related information, and the terminal-side image data identification information constituting identification information of the symbol image data stored in the terminal-side symbol image data storage means, which are transmitted from the mobile phone terminal,

a latest symbol image data discrimination means that discriminates whether the symbol image data stored in the mobile phone terminal are the latest data, on the basis of the terminal-side image data identification information and the server-side image data identification information received,

a latest data notice information transmitting means that transmits notice of information on the latest data indicating that the symbol image data stored in the terminal-side symbol image data storage means are the latest and does not transmit the symbol image data stored in the server to the mobile phone terminal, when the symbol image data stored in the mobile phone terminal are determined as being the latest,, and

the terminal resolution discrimination means that discriminates the transmitted symbol image data on the basis of the resolution related information received, when the symbol image data stored in the mobile phone terminal are determined as not being the latest,

KIKUCHI ET AL.
Appl. No. 10/576,871

wherein the mobile phone terminal comprises the following components (A6), (A11), and (A12):

(A6) the terminal-side image data identification information storage means that stores the terminal-side image data identification information,

(A11) the symbol image data transmission request information transmitting means that transmits the symbol image data transmission requests, the resolution related information, and the terminal-side image data identification information to the server, before creating images displayed on the information display screen,

(A12) a latest data notice information receiving means that receives notice of information on the latest data indicating that the symbol image data stored in the terminal-side symbol image data storage means are the latest data.

Claim 12 (Original): A server capable of transmitting to and receiving image data from a mobile phone terminal comprising:

an information display screen on which information is displayed,

a resolution related information storage means that stores resolution related information pertinent to the resolution of the information display screen,

a display image data transmission request information transmitting means that transmits display image data transmission requests for transmission of the display images arranged on the information display screen and the resolution related information to the server, and

a display image data receiving means that receives display image data transmitted from the server,

wherein the server comprises the following components (D1) through (D5):

KIKUCHI ET AL.
Appl. No. 10/576,871

(D1) a server-side symbol image data storage means that stores symbol image data which are used to create the display images partly constituting specific graphic symbols, in correspondence with the resolution of the information display screen of the mobile phone terminal,

(D2) a display image data transmission request information receiving means that receives the display image data transmission requests and the resolution related information, which are transmitted from the mobile phone terminal,

(D3) a terminal resolution discrimination means that discriminates the symbol image data in correspondence with the resolution of the information display screen, on the basis of the resolution related information received,

(D4) a display image creation means that creates the display images arranged on the information display screen of the mobile phone terminal, using the symbol image data which is discriminated by the terminal resolution discrimination means, in correspondence with the resolution of the information display screen, and

(D5) a display image data transmitting means that transmits display image data constituting the data of created display images.

Claim 13 (Original): A mobile phone terminal capable of transmitting to and receiving image data from a server comprising:

a server-side symbol image data storage means that stores symbol image data which are used to create the display images partly constituting specific graphic symbols arranged in correspondence with the resolution of the information display screen of the mobile phone terminal,

KIKUCHI ET AL.
Appl. No. 10/576,871

a display image data transmission request information receiving means that receives display image data transmission requests for transmission of the display images arranged on the information display screen and resolution related information pertinent to the resolution of the information display screen,

a terminal resolution discrimination means that discriminates the symbol image data in correspondence with the resolution of the information display screen, on the basis of the resolution related information received,

a display image creation means that creates the display images arranged on the information display screen of the mobile phone terminal, using the symbol image data which is discriminated by the terminal resolution discrimination means in correspondence with the resolution of the information display screen, and

a display image data transmitting means that transmits display image data constituting the data of created display images,

wherein the mobile phone terminal comprises the following components (C1) through (C4):

(C1) the information display screen on which information is displayed,

(C2) a resolution related information storage means that stores the resolution related information pertinent to the resolution of the information display screen,

(C3) a display image data transmission request information transmitting means that transmits the display image data transmission requests for transmission of the display images arranged on the information display screen and the resolution related information to the server, and

KIKUCHI ET AL.
Appl. No. 10/576,871

(C4) a display image data receiving means that receives the display image data transmitted from the server.

Claims 14-22 (Canceled).

Claim 23 (New): A mobile phone terminal capable of transmitting to and receiving image data from a server comprising:

a server-side symbol image data memory that stores symbol image data which are used in creating display images partly constituting specific graphic symbols arranged on an information display screen of the mobile phone terminal in correspondence with a resolution of the information display screen,

a symbol image data transmission request information receiver that receives symbol image data transmission requests to transmit the symbol image data stored in the server and resolution related information pertinent to the resolution of the information display screen,

a terminal resolution discriminator that discriminates the symbol image data transmitted to the mobile phone terminal on the basis of the resolution related information received, and

a symbol image data transmitter that transmits the symbol image data which is discriminated by the terminal resolution discrimination means, in correspondence with the resolution of the information display screen of the mobile phone terminal,

wherein the mobile phone terminal comprises:

the information display screen,

a resolution related information memory portion that stores the resolution related information,

KIKUCHI ET AL.
Appl. No. 10/576,871

a terminal-side symbol image data memory portion that stores the symbol image data,
a symbol image data transmission request information transmitter that transmits the
symbol image data transmission requests and the resolution related information, and
a symbol image data receiver that receives the symbol image data transmitted from the
server.

Claim 24 (New): A mobile phone terminal comprising:
a display screen;
a memory storing display screen resolution information;
a transmitter for transmitting to a server a symbol image data request and the display
screen resolution information;
a receiver for receiving symbol image data transmitted from the server in response to the
request and the display screen resolution information; and
a controller for generating map images for display on the information display screen,
wherein the map images comprise one or more symbols corresponding to the received symbol
image data.

Claim 25 (New): The mobile phone terminal according to claim 24, wherein the
display screen resolution information comprises one or both of a horizontal dot number and a
vertical dot number.

Claim 26 (New): The mobile phone terminal according to claim 24, wherein the
display screen resolution information comprises a number of pixels.

KIKUCHI ET AL.
Appl. No. 10/576,871

Claim 27 (New): The mobile phone terminal according to claim 24, wherein the display screen resolution information comprises a resolution classification.
